

## **How to Prepare for Your Termite Treatment**

Thank you for allowing Innovative Pest Solutions to treat and protect your home from termites. This quick note is to let you know what to expect and how to prepare for this treatment.

- If your house has a garage or an attached storage room, any stored items against the walls will need to be pulled out about three feet. Our technicians will need room enough to drill holes, treat the holes, and patch them with cement patch.
- Please let us know in advance if your house does not have running water or if the electricity has been turned off.
- We will need to have access to the garage, the crawlspace, any attached storage rooms that have a cement slab floor, and underneath decks.
- Please keep in mind that it may take thirty days or more to completely eliminate the termites. If you see anything suspicious after thirty days, don't hesitate to call us so we can come check it out.

**Thank you for choosing Innovative Pest Solutions!**
